Profile

Versatile Full Stack Developer with expertise in building scalable digital solutions across web and mobile platforms. Proficient in modern JavaScript frameworks including Next.js, TypeScript, React.js, and React Native (Expo), building full-stack applications with Supabase, MySQL, and PHP.

I am self-motivated, flexible, diligent, and cool under pressure — always learning new technologies and focused. I thrive in fast-paced environments where technical excellence meets business needs.

Employment History

Full Stack Developer (Freelance)
JVL Electronics

May 2025 — Aug 2025

- Designed modern and intuitive user interfaces and wireframes using Figma.
- Built using Next.js for the customer storefront to optimize SEO performance and initial page load speeds, while implemented Vite for the admin dashboard for better user experience.
- Integrated Medusa.js headless commerce platform for the admin panel for faster development.

Frontend Developer | UI/UX Designer
ROC.PH Digital Marketing Services

Jun 2024 — Sep 2024

- Redesigned and implemented user interfaces for the company's internal systems.
- Conducted user research to identify clients needs and preferences and translated into design solutions.
- Developed the company's appointment web application system using Google Calendar API to automate event scheduling between the clients and the CEO.
